The in-depth review of the Touchstone Energy programs and benefits was very helpful. We took each program and decided if we want to address it in the short term or long term. Many of the programs have been added or updated, so having this review every few years would be quite helpful for strategic and budget planning.

- Lydia Walters, Comm. and HR Manager
  Dixie Electric Power Assn. MS

Overview

Are you maximizing your investment in Touchstone Energy? If you don’t know the answer, let’s review and make sure you are taking advantage of all the resources we offer that will help you meet your co-op’s goals and exceed your member-owners’ expectations.

- The first step is completing the Best in Class Survey so we can provide you with a customized report about the return on your investment. Scan the code to the right to take the survey.

- Next we can schedule a WebEx or phone call with key members of your team to discuss your co-ops’ goals and how Touchstone Energy can help you achieve them.

- We’ll also ask you to identify a brand ambassador. This is the person at your co-op who will be responsible for keeping up with Touchstone Energy programs and sharing the news and resources with coworkers.

- If you’d like a face-to-face meeting for a full-day strategic consultation, please reach out to us to schedule. You can also check in with your Regional Member to see if this consultation is being offered as a member benefit.
  *Please allow for cost of facilitator travel.*
